How will I determine my drug costs?	<p>Our plan groups each medication into one of five “tiers.” You will need to use your formulary to locate what tier your drug is on to determine how much it will cost you. The amount you pay depends on the drug’s tier and what stage of the benefit you have reached. Later in this document we discuss the benefit stages that occur: Initial Coverage, Coverage Gap, and Catastrophic Coverage.</p>	<p>Our plan groups each medication into one of five “tiers.” You will need to use your formulary to locate what tier your drug is on to determine how much it will cost you. Coverage Gap	<p>Most Medicare drug plans have a coverage gap (also called the “donut hole”). This means that there’s a temporary change in what you will pay for your drugs. The coverage gap begins after the total yearly drug cost (including what our plan has paid and what you have paid) reaches \$3,750.</p> <p>After you enter the coverage gap, you pay 35% of the plan’s cost for covered brand name drugs and 44% of the plan’s cost for covered generic drugs until your costs total \$5,000, which is the end of the coverage gap. Not everyone will enter the coverage gap. Under this plan, you may pay even less for the brand and generic drugs on the formulary. Your cost varies by tier. You will need to use your formulary to locate your drug’s tier. See the chart that follows to find out how much it will cost you.</p>	<p>Most Medicare drug plans have a coverage gap (also called the “donut hole”).
